

Food Waste Reduction and Donation: A recipe for change. **CODE CATALYSTS**

Introduction

Food waste is a major global issue that contributes to hunger and environmental problems. This presentation will explore ways to **reduce food waste** and fight hunger.

Solution

A website can be work as a bridge between food donors and the people who are in need of food.

The website which is going to do conversation between both the parties.

Tech Stack

We are going to use html, css, javascript for the website

Uniqueness of Idea

- By this website we can stop wastage of food.
- By this idea there would ease for the organizers who are regularly working for food donation purpose

Flow of the Website

- ✓ There would be different page for donaters and connected to organizer mail.
- ✓ Organizer will receive mail and address of donor and can able to collect food.

Thanks!
